AMENDMENTS

In the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) An artificial intellectual stock ordering system suited to deal with a stock ordering process, comprising:

an input unit for inputting transaction conditions;

an ordering computer coupled with the input unit, said ordering computer receiving the transaction conditions, and retrieving, analyzing and classifying news documents, assigning a grade to each news document, and outputting stock ordering information for ordering a stock purchase or sale, while the transaction conditions are matched and the grade is larger than a high value, or while the transaction conditions are matched and the grade is smaller than a low value;

an electronic news computer connected to the ordering computer through a first network suited to provide the news document; and

a security company computer connected to the ordering computer through a second network suited to receive the stock ordering information to buy or sell a stock.

2. (Original) The system as claimed in claim 1, wherein the input unit comprises a keyboard.

- 4. (Original) The system as claimed in claim 1, wherein the transaction conditions comprise a glossy index.
- 5. (Original) The system as claimed in claim 1, wherein the transaction conditions comprise an individual index.
- 6. (Original) The system as claimed in claim 1, wherein the transaction conditions comprise an associated index.
- 7. (Original) The system as claimed in claim 1, wherein the ordering computer comprises a network server.
- 8. (Original) The system as claimed in claim 1, wherein the first network and the second network consist of the Internet, LAN and WAN.
 - 9 14. (Cancelled)
